

# Get Started

## Install Magic ✨ command-line tool

```
$ curl -ssl https://magic.modular.com | bash
```

Magic is a package manager and virtual environment tool that ensures your MAX and Mojo builds are consistent and reproducible. [Learn more.](#)

## Build something amazing

### MAX ✨

Get Started with MAX

Tutorial  
Deploy a model with  
Kubernetes and Helm

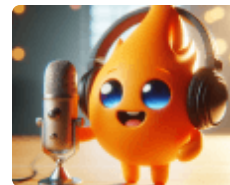

Tutorial  
Run an ONNX model  
with Python

More

Deploy a model with Amazon  
SageMaker and AWS  
CloudFormation

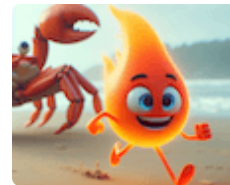

### Mojo 🔥

Get Started  
with Mojo

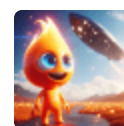

Introduction to  
Mojo

Intro to value  
ownership

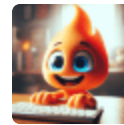

More

Python integration

Get started with Max Graph

Debugging
